ABSTRACT

This 1987-88 edition of Association of College and Research Libraries (ACRL) statistics presents data from 100 U.S. and Canadian libraries that are not members of the Association of Research Libraries (ARL), and are not covered by the annual ARL statistics. The 129 non-ARL libraries that were surveyed for this report were classified by the revised Carnegie classification as "Research Universities" I and II and "Doctorate-granting Universities" I and II. Several libraries that had contributed data to previous editions were also asked to participate. The data in this report are based on responses from 101 libraries. For the 70 libraries that had contributed data both in 1978-79 and 1987-88, total expenditures more than doubled during the 9 years between surveys, i.e., from more than $1.8 million to almost $3.8 million. In spite of an increase of 115% in materials expenditures (excluding serials), the libraries had a decline of 1% in the number of volumes added. An increase in the serials budget of 170% at these libraries has resulted in an increase in current serials received only 9%. The number of new employees increased by 10.7%, and their salaries increased by 92% while the Consumer Price Index increased by 70%. The data are organized into 17 charts ranking the order of each of the participating libraries for materials and collections (volumes, serials, microform); salaries and other operating expenses; circulation; and number of library personnel. I. INTRODUCTION

The 1987-88 edition of the *ACRL Statistics* presents data from 100 U.S. and Canadian libraries. These libraries are a major resource not only for their parent institutions but also for the two countries because they contained 77,696,825 volumes and spent about $330 million, of which over $127 million[1] went for purchasing materials. Almost 10,000 people (2,638 professionals, 4,628 nonprofessionals, and 2,688 FTE student workers) were employed by these libraries. The table on pages 25-27 gives other summary data from the libraries whose data are included in these *Statistics*.

The Association of College and Research Libraries (ACRL), a division of the American Library Association, has long been an active publisher of academic library statistics. A substantial series of such data was started in the 1920's and was continued by ACRL until the 1960's. This series included a large number of libraries from institutions of all types and sizes. The Association of Research Libraries (ARL) is the steward of a series of data that began in 1908, before the founding of the Association. Other series of data, such as that collected from southern colleges and university libraries at Louisiana State University since 1928, " continue to be published.

In 1978, in an attempt to broaden data coverage of academic institutions, the ACRL Board of Directors financed a "pilot study to gather comparable data from the 103 university libraries not covered in the *ARL Statistics* for the year 1978-79."[2] These statistics were gathered from libraries at universities which were classified by the Carnegie Commission as "Doctorate-Granting" and which were not members of ARL.[3] Ten Canadian institutions alike in character to the U.S. institutions were also chosen for the ACRL data collection survey. The data were collected using the same form as ARL used in surveying its members and the data were presented in the *ACRL University Library Statistics, 1978-79* in the same format ARL used in the *ARL Statistics* for that year. ACRL published similar collections of statistics for 1981-82, 1983-84, and 1985-86. This publication, then, is the fifth in this series which covers a period of 10 years.

For this publication, 129 libraries were surveyed. These libraries were chosen from the revised 1987 Carnegie classification.[4] All non-ARL libraries that were classified as "Research Universities" I and II and "Doctorate-granting Universities" I and II were surveyed. In addition, several libraries which had contributed data to the 1978-79, 1981-82, and 1983-84 collections were asked to participate. 101 responses were received. The library at one institution, the University of Illinois at Chicago, subsequently joined ARL, and its data are included in the 1987-88 *ARL Statistics*.

For the first time, the ACRL data are being made available in machine readable form for use on IBM compatible microcomputers in the separately published *ACRL Statistics, 1978/79-1987/88*. This publication contains diskettes with the data in several common formats and a guide to the machine readable data. Data from institutions whose survey forms were returned too late to be included in this edition of the *ACRL Statistics* will be available in the machine readable version of the data.

In order to look at trends over the decade of the machine readable ACRL data, a comparable set of institutions must be chosen. Data from the 70 institutions reporting data in both 1978-79 and 1987-88 are examined below. Many of the variables are not available for all institutions so that totals can be misleading because they may reflect different numbers of libraries. For that reason, primarily mean values are used here.

Changes in ACRL Libraries' Characteristics from 1978-79 to 1987-88:*

	1978-79	1987-88	% Increase
Collections:			
Total Volumes Held	45,406,639	63,513,037	40%
Mean Number of Volumes Held	648,666	907,329	40%
Mean Number of Volumes Added, Gross	26,973	26,611	-1%
Mean Number of Current Serials Held	7,433	8,072	9%
Staff:			
Mean Number of Professionals	25.5	29.3	14.9%
Mean Number of Nonprofessionals	47.9	53.4	11.5%
Mean Number of Student Workers	29.0	30.2	4.1%
Mean Number of Total Staff	102.0	112.9	10.7%
Expenditures:			
Mean Expenditures for Library Materials	$677,089	$1,455,889	115%
Mean Expenditures for Serials	317,314	855,331	170%
Mean Expenditures for Salaries and Wages	967,063	1,859,736	92%
Mean Total Expenditures	1,819,395	3,796,979	109%

* For the 70 libraries which reported data in 1978-79 and in 1987-88.

Over the period, total expenditures more than doubled. In spite of the 115% increase in materials expenditures (excluding serials) that these 70 ACRL libraries reported, they still had a decline of 1% in volumes added. An increase in the serials budget of 170% at these libraries has resulted in an increase in current serials received of only 9%. The expenditures for salaries and wages have not gone up as much as the expenditures for the two other categories (only 92%) examined while the number of these employees increased by 10.7%. During this period, the Consumer Price Index increased by about 70%. Although there is no way to measure directly how increases in price levels affected libraries, the Consumer Price Index is often used as an approximation of the effect of inflation on libraries.

Data collection is arguably the oldest and most successful form of library cooperation. The many librarians who collected and submitted data, often with excellent footnotes when their library's data didn't quite match what was requested, took time from their other activities to make a contribution to our understanding of libraries. Their good work is much appreciated.

We also thank Mary Ellen Davis, ACRL program officer, and her assistant, Dawn Jacobson, for coordinating this project. The work of others who helped in the compilation of these data is appreciated: Kendon Stubbs and Dorie Bertram lent their assistance in a number of ways, particularly with several difficult coding problems. William A. Ragland advised on typography and design of the publication. Thanks are also due to the Research Center Annex at the School of Library and Information Science at Louisiana State University for their help in producing the report. Finally, thanks to Robert Molyneux, assistant professor at Louisiana State University, and his assistants, Stuart Douglass, who wrote the input programs, and Steven Self, who coded, keyed, and checked the data, for compiling the data and producing the report.

JoAn S. Segal,
Executive Director
Association of College and Research Libraries

Kent Hendrickson,
Chair, ACRL Academic Library
Statistics Committee

ANALYSIS OF SELECTED VARIABLES OF UNIVERSITY LIBRARIES

The percentages and ratios below are intended to summarize the basic data in the ACRL Library Data Tables. The high and low figures indicate the range while the mean and median values give an idea of the average, or typical, value for ACRL's university library members.

	Category	High	Mean	Median	Low
1.	Professional Staff as a percent of Total Staff	54	27	26	16
2.	Nonprofessional Staff as a percent of Total Staff	72	45	46	17
3.	Student Assistant Staff as a percent of Total Staff	61	27	29	2
4.	Ratio of Professional Staff to Non-professional Staff (excluding student assistants)	2.3	0.7	0.6	0.3
5.	Ratio of Items Loaned to Items Borrowed	6.3	1.6	1.5	0.2
6.	Serials Expenditures as a percent of Materials Expenditures	96	61	63	23
7.	Materials Expenditures as a percent of Total Operating Expenditures	64	38	38	13
8.	Contract Binding as a percent of Total Operating Expenditures	2.9	1.5	1.5	0.0
9.	Salary and Wage Expenditures as a percent of Total Operating Expenditures	70	49	48	28
10.	Other Operating Expenditures as a percent of Total Operating Expenditures	34	11	9	1
11.	Unit costs of Monographs (per volume)	78.43	33.31	31.69	2.54
12.	Unit costs of serials (per title)	356.64	146.77	149.26	34.33

A problem that often arises in looking at library variables is deciding what the "typical" library does. For example, what percent of a typical university library's budget is spent on materials expenditures? There are two problems in analyzing a question like this. First, there is often a good bit of variation in what libraries report they do, because practices are diverse or because the reporting of those practices introduces variation. The second problem is that libraries of all types, typically, have highly skewed distributions, that is, there tend to be few large libraries and many relatively smaller libraries. The behavior of many variables, such as number of employees, dollars spent, *etc.* are similarly skewed. In skewed distributions, the median, or central value (that is, there are as many values above the median as below it) is often a better indicator of the "typical" situation than the mean (or arithmetic average). Because ratios tend to be less skewed, the mean and medians are both given.

SUMMARY OF RANK ORDER TABLES FOR UNIVERSITY LIBRARIES

The table below presents the rank for each university library in each of the seventeen categories for which rank order tables are prepared. These rank order tables follow on pages 38-54.

The table numbers at the head of the table below refer to the following:

Table 1 - Volumes in Library
Table 2 - Volumes Added (Gross)
Table 3 - Current Serials (Total)
Table 4 - Microform Holdings
Table 5 - Materials Expenditures
Table 6 - Salaries and Wages Expenditures
Table 7 - Other Operating Expenditures
Table 8 - Total Expenditures
Table 9 - Monographs Purchased (Volumes)
Table 10 - Expenditures for Monographs
Table 11 - Serials Purchased
Table 12 - Expenditures for Serials
Table 13 - Total Items Loaned
Table 14 - Total Items Borrowed
Table 15 - Professional Staff (FTE)
Table 16 - Nonprofessional Staff (FTE)
Table 17 - Total Staff (FTE)

VII. COMPILER'S NOTES

The obligation of the compiler is to present the data collected as accurately as possible with a minimum of intrusion in the process. Unfortunately, intrusion is often necessary to present the data accurately. For instance, survey forms from a library may contain obvious mistakes, such as figures that do not add up or that are impossibly large or small. All cases of apparent mathematical errors were checked with those who filled out the surveys at the libraries and changes were made in the data only after that check.

The compiler may introduce error in the process of compilation. No amount of checking ever seems to clean up all errors. Small keying errors, for example, are difficult to catch. As a result of the fact that these data are in machine readable form, it is now possible to correct the errors. Anyone noticing an error is asked to notify ACRL.

The three sections below deal with aspects of these data that deserve special note.

1. Staff

The instructions sent to the libraries surveyed for this year's *ACRL Statistics* requested that the number of "professionals," "nonprofessionals," and student workers reported be rounded off to whole numbers. These instructions were borrowed from those sent to ARL institutions for the *ARL Statistics*. Quite a few ACRL institutions did not round these figures. There were two ways of handling these cases: round these figures off for the responding libraries or report them in the *Statistics* as they were received. There is a dilemma: presumably, other institutions rounded the figures off and by not rounding these unrounded figures, comparability between the ACRL institutions' figures may be weakened. On the other hand, possible rounding errors would be introduced and information would be discarded. See Appendix 2, pages 2-4 and 2-5 of the *ACRL University Library Statistics, 1985-86...* for an example of the kinds of introduced errors referred to. In addition, .5 of one employee is more significant at an ACRL institution with a median of 98 employees than at an ARL institution, which has a median of 269 employees. It was decided to include fractional values of employees in these tables.

2. Footnotes

The footnotes which are presented in Chapter IX (on pages 67-79) record a great deal of information about the responding libraries. The chief use of these footnotes will be to enhance the understanding of these data by describing how they differ from what was requested or by noting what was included in the figures and what was left out. For example, someone analyzing data from several libraries will be aware that some include information from a law library and others do not.

Much information was submitted about the responding libraries which was not obviously relevant to a better understanding of the statistics reported here but which did give useful information about the libraries themselves. Virtually all such information was included in these footnotes. In addition, there was a minimum of editorial intervention. Except for obvious grammatical errors, the goal was to use the language of the original note as much as possible and, in effect, intrude as little as possible in the communication of this information about the libraries to any reader of the footnotes.

A few cases of apparent mathematical error are not errors. Libraries are complex organizations and those filling out the forms have a difficult task of fitting data from their institutions into a comparatively simple form accurately. Occasionally adjustments have to be made to take local situations into account. There are few of these special cases and they are given in the footnotes.

3. U/A, N/A, and Missing Values

A number of libraries had difficulty with the difference between "U/A," meaning that the item exists at the library but information on it is "unavailable," and "N/A," meaning that the requested piece of data is "not applicable" to that library. For instance, if a library were asked to report how many Ph.D.'s its parent institution awarded and that institution did not award Ph.D.'s, the response would be "N/A." However,

55

these responses were used interchangeably on the questionnaires returned in the survey. There were three common examples, one with serials received, one with materials expenditures, and one with expenditures for employees' salaries and wages. In all three cases, variables which had been collected by ARL and ACRL were separated into their constituent elements. This process of disaggregation is an important one to our understanding of libraries but traditionally it takes a few years of collection before the surveyed libraries are able to supply information on new variables of any kind without difficulty. It takes time for many libraries to develop the means to collect new data elements. In all cases where there was a question about "U/A" and "N/A," the library was called and attempt made to resolve the question.

The three cases of difficulty with disaggregation are dealt with separately, because they are handled differently. The practice followed in these cases is the same as that followed by ARL.

For a number of years, the ARL and ACRL surveys have attempted to determine how many serials the various libraries currently receive. Using these data, it is possible to get a rough idea of how much these libraries spent on serials by dividing a library's expenditures for serials by the number of serials currently received by the library. However, it is not possible to calculate the average price paid for each serial item because these large academic libraries often receive many serials without purchasing them. Items received on U.S. Government deposit are examples. Given the importance of the question of serials' prices and their effect on academic libraries, ARL separated the question of the number of serials received into the number of serials currently received that are purchased and the number received but not purchased. Questions 7-9 on the questionnaire deal with this matter. (A copy of the forms sent to the libraries begins on the next page; the survey itself begins on page 63.) Many libraries knew how many serial items they received but could not separate them into how many they purchased and how many were received but not purchased. The proper response in this case would be to reply "U/A" to 7 and 8 and put the number of serials received in 9. However, a large number of institutions put the number received in 7 and 9 and replied either "N/A" or "U/A" to question 8. Each institution which replied in this manner was called and, where appropriate, "U/A" was entered as a response to 7 and 8. These data appear in the data tables in columns 5-7. A few institutions received no serials that were not purchased.

The second common example of confusion between these "U/A" and "N/A" is similar and occurred with questions 21-23, where expenditures for salaries and wages are broken down into expenditures for professionals (21), nonprofessionals (22), and students (23). These three should total the sum reported in question 24, total expenditures for salary and wages. A number of libraries could not distinguish between the salaries paid professionals and nonprofessionals and typically in the responses from these libraries, the total for professional and nonprofessional salaries was entered as expenditures for professional salaries. As with the case of serials, the libraries were called, and after consultation questions 21 and 22 were entered as "U/A" and appear that way in the data tables in columns 21 and 22.

The third example of not being able to distinguish between "U/A" and "N/A" occurred with questions 15-18, where various items that make up the total expenditures for materials are disaggregated. Adding these responses should give a sum equal to the response to question 19, total library materials expenditures. However, not all libraries break their expenditures down in the manner specified and those responding used various combinations of "N/A" and "U/A" to report their institutions' characteristics. An attempt was made to contact the libraries where this kind of question arose. After consulting about these cases, a decision was made on a case by case basis about how to code the data. In all cases where two separate expenditure categories were reported together, one was substantially larger than the other and reporting two categories as "U/A" would have been virtually pointless. As a result, "U/A" was used for the smaller expenditure category. Footnotes are made where applicable.

As a result of these decisions, there will be cases where the sums of the disaggregated items will not equal the aggregated items. For example, if serials purchased and not purchased are added, they will not total the number of serials received in cases where either or both are coded as "U/A."

ACRL STATISTICS, 1987-88

Instructions for Completing the Questionnaire

1. Definitions of the statistical categories used in this questionnaire can be found in *American National Standard for Library and Information Sciences and Related Publishing Practices - Library Statistics*. Z39.7-1983. (New York, American National Standards Institute, 1983.)

2. The questionnaire assumes a fiscal year ending June 30, 1988. If your fiscal year is different, please provide a footnote on p. 4 of the questionnaire.

3. **Please do not use decimals.** All figures should be rounded to the nearest whole number.

4. **Please do not leave any lines blank.** If the appropriate answer is zero or none, use **0**. If an exact figure is unavailable, use **U/A**. If a question is not applicable to your library, use **N/A**.

5. In a university which includes both main and branch campuses, an effort should be made to report figures for the main campus only. (The U.S. National Center for Education Statistics in its Integrated Postsecondary Education Data System (IPEDS) survey described a **branch campus** as one "located in a community different from that of its parent institution ... beyond a reasonable commuting distance from the main campus ... The educational activities at the location must be organized on a relatively permanent basis ... and include course offerings for one or more complete college-level programs of at least one full year.") If figures for libraries located on branch campuses are reported, please provide an explanatory footnote on p. 4 of the questionnaire.

6. A **branch library** is defined as an auxiliary library service outlet with quarters separate from the central library of a system, which has a basic collection of books and other materials, a regular staffing level, and an established schedule. A branch library is administered either by the central library or (as in the case of some law and medical libraries) through the administrative structure of other units within the university. Departmental study/reading rooms are not included.

7. **Questions 1-6. Collections.** Use the ANSI Z39.7-1983 definition for **volume** as follows:

> a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, contained in one binding or portfolio, hardbound or paperbound, which has been cataloged, classified, and made ready for use.

Include duplicates and bound volumes of periodicals. Exclude microforms, maps, nonprint materials, and uncataloged items. Exclude government document volumes unless they are cataloged, classified, and shelved as part of the general collection. If any of these items cannot be excluded, please provide an explanatory footnote on p. 4 of the questionnaire. For purposes of this questionnaire, unclassified bound serials that are arranged in alphabetical order are considered classified.

8. **Question 2.** Include only volumes cataloged, classified, and made ready for use.

9. **Question 6.** Report number of volumes purchased. Include all volumes for which an expenditure was made during 1987-88, including volumes paid for in advance but not received during the fiscal year. Include monographs in series and continuations. If only number of titles purchased can be reported, please report the data and provide an explanatory footnote on p. 4 of the questionnaire. **Note:** This question is concerned with volumes purchased rather than volumes received or

cataloged. Question 15 requests the expenditure for the volumes counted here.

10. **Questions 7-9. Serials**. Include duplicate subscriptions and only those government document serials that are cataloged, classified, and shelved as part of the general collection; do not include government documents serials that are housed in a separate government documents collection. Exclude monographic and publishers' series. A **serial** is

> a publication issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies.

11. **Question 8.** If the number of nonpurchased serials is not available, report only the total number of current serials received on line 9, and report **U/A** for lines 7 and 8.

12. **Question 10. Microforms**. Include number of reels of microfilm, number of microcards, and number of microprint and microfiche sheets. Exclude government document microforms.

13. **Questions 11-14. Personnel.** Report the number of staff in filled positions, or positions which are only temporarily vacant. Include cost recovery positions and staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. If such staff cannot be included, provide a footnote on p. 4 of the questionnaire. The number of FTE staff should be determined on the basis of the length of the work week in the reporting library. Round figures to the nearest whole numbers.

14. **Question 11**. Since the criteria for determining professional status vary among libraries, there is no attempt to define the term "professional." Each library should report those staff members it considers professional, including, when appropriate, staff who are not librarians in the strict sense of the term, such as computer experts, systems analysts, budget officers, etc.

15. **Questions 15-26. Expenditures**. Report all expenditures of funds that come to the library from the regular institutional budget and from other sources, such as research grants, special projects, gifts and endowments, and fees for service. Canadian libraries should report expenditures in both Canadian and U.S. dollars. To determine figures in U.S. dollars, divide Canadian dollar amounts by xxxxxx, the average monthly noon exchange rate published in the Bank of Canada *Review* for the period July 1987 - June 1988.

16. **Question 15**. Include here expenditures for volumes reported on line 6.

17. **Question 16**. Exclude monographic and publishers' series.

18. **Question 17**. Include all materials except monographs and current serials, e.g. microforms, backfiles of serials, charts and maps, audiovisual materials, manuscripts, electronic media, etc. If expenditures for these materials are included in lines 15 and/or 16 and cannot be disaggregated, please report U/A and provide a footnote on page 4.

19. **Question 18**. Include any other materials funds expenditures not included in questions 15-17, e.g., expenditures for bibliographic utilities, literature searching, security devices, memberships for the purposes of publications, etc. Please list categories, with amounts, in a footnote on p. 4 of the questionnaire. Note: If your library does not use materials funds for non-materials expenditures, **please report 0, not U/A.** (Many libraries include expenditures for these items in Other Operating Expenditures, line 25.)

20. **Question 20**. Include only contract expenditures. If all binding is done in-house, state this fact and give in-house expenditures in a footnote on p. 4 of the questionnaire; do not include personnel expenditures.

21. **Questions 21-24**. Exclude fringe benefits.

22. **Questions 23-24**. Report 100% of student wages. Include federal and local funds for work study students, regardless of budgetary source of funds.

23. **Question 25**. Exclude expenditures for buildings, maintenance, and fringe benefits.

24. **Questions 27-28**. Include both original materials and photocopies in lieu of originals.

25. **Questions 29-30. Ph.D. Degrees**. Please note that only the number of Ph.D. degrees are to be counted. Statistics on all other advanced degrees (e.g., D.Ed., D.P.A., M.D., J.D.) are not included in this survey. If you are unable to provide a figure for Ph.D.s only, please note this in a footnote on p. 4 of the questionnaire.

26. **Question 30**. For the purposes of this report, Ph.D. fields are defined as the specific discipline specialties formerly enumerated in the form used by the U.S. Department of Education entitled, "Integrated Postsecondary Education Data System Survey, Postsecondary Completions," designated as ED (CS) Form G50-14P-C. Although the IPEDS form requests figures for all doctoral degrees, only fields in which Ph.D.s are awarded should be reported on the ACRL questionnaire. Any exceptions should be noted in a footnote on p. 4 of the questionnaire.

27. **Questions 31-34. Enrollment.** U.S. libraries should use the 1987-88 enrollment figures reported to the Department of Education on the form entitled "Integrated Postsecondary Education Data System, Fall Enrollment . . . 1987," designated as ED (CS) Form G50-14P-EF. The line and column numbers on the IPEDS form for each category are noted on the questionnaire. Please check these figures against the enrollment figures reported to ACRL in 1986 to ensure consistency and accuracy. **Note:** In the past, the number of part-time students reported was FTE; the number now reported to IPEDS is a head count of part-time students.

28. **Question 35. Faculty**. Instructional faculty are defined as those members of the Instructional/Research staff who are employed on a full-time basis and whose major regular assignment is instruction, including those with released time for research.

29. **Footnotes.** Reporting libraries are urged to record in the footnote section any information that would clarify the figures submitted, e.g., the inclusion of branch campus libraries. Explanatory footnotes will be included with the published statistics.

30. If you completed the ACRL Statistics Questionnaire in 1985-86, please compare those figures with the survey you have just completed. On occasion, an error will be detected because of an unusual difference between numbers submitted this year and those for the preceding survey. If an unusual change has occurred, please provide an explanatory footnote on p.4 of the questionnaire.

31. Before returning the questionnaire, **please check all math**. Many follow-up telephone calls can be avoided if math errors are corrected before the questionnaire is submitted.

32. Return one copy of the completed questionnaire to ACRL Office by **November 1, 1988**. If there are any questions about the procedure to be followed in completing these questionnaires, contact Mary Ellen Davis at the ACRL Office, 312-944-6780 ext. 287 or Toll-free: 1-800-545-2433; in Illinois 1-800-545-2444; in Canada 1-800-545-2455. Please be sure the library director has signed the questionnaire before it is returned to the ACRL Office.

FOOTNOTES FOR ACRL STATISTICS, 1987-88

Reporting libraries are urged to record in the footnote section any information that would clarify the figures submitted, e.g., the inclusion of branch campus libraries. Explanatory footnotes will be included with the published statistics.

1. Law Library statistics are included in the figures given in this form.

   _____ Yes _____ No _____ We do not have a Law Library

2. Medical Library statistics are included in the figures given in this form.

   _____ Yes _____ No _____ We do not have a Medical Library

3. Other main campus libraries not included:

   _____

   _____

   _____

4. Figures include reports from branch campus libraries. *(See instruction 5)*

   _____ Yes _____ No _____ We have only one campus.

5. If branch campus libraries are included, please specify which campuses.

   _____

   _____

6. If branch campus libraries are **not** included, please specify which campuses:

   _____

   _____

7. Basis of volume count is: _____ Physical _____ Bibliographical

8. Count of current serials (Questions 7-9) includes government document serials.

   _____ Yes _____ No

9. Fringe benefits are included in expenditures for salaries and wages (Questions 21-24).

   _____ Yes _____ No

10. Other comments:

    _____

    _____

    _____

    _____

    _____

FOOTNOTES FOR ACRL STATISTICS, 1987-88

11. Please list here any explanatory footnotes that would clarify the figures submitted, e.g., figures for volumes held are estimated; salary figures include fringe benefits; figures are for Main Library only. Explanatory footnotes will be included with the published statistics.

Please return completed questionnaire to the ACRL Office by November 1, 1988.

BUILDING ON THE FIRST CENTURY

September 15, 1988

Dear Library Director:

Enclosed are copies of the questionnaire for the ACRL University Library Statistics 1987-88. Please read the instructions carefully. There have been major changes in the questionnaire. The new form requires a brief explanation since it returns to the format used by the Association of Research Libraries (ARL).

In 1986 the Committee was asked by the ACRL Executive Board of Directors to investigate the possibility of making statistics reporting uniform for academic libraries. Considerable progress was made towards this end and resulted in the survey instrument used for the 1985-86 survey. The instrument was based on the proposed form to be used by the Department of Education Integrated Postsecondary Education Data System (IPEDS). The IPEDS form will make its first appearance this fall.

In addition, the Committee was asked to expand data collection to a much larger group of academic libraries. The goal was eventually to canvas 2500 libraries of all types--university, college, and community college. Unfortunately, the Committee was less successful with its efforts in this area. It was determined that the cost to ACRL of one year's survey could be as much as $150,000. For that reason, the Committee reluctantly recommended to the ACRL Board of Directors during the recent New Orleans Conference that ACRL abandon its goal of expanding coverage. The Board accepted the Committee's recommendation. ACRL has continued its practice of surveying those non-ARL institutions which are included in the categories of Research Universities I and II and Doctorate Granting Colleges and Universities I and II (see the Carnegie Foundation's A Classification of Institutions of Higher Education, 1987). Our list has been updated to reflect the revised Classification appearing in 1987.

Since expanded coverage was not possible, the Committee also recommended that ACRL return to using the ARL survey instrument. It was felt that university libraries were more familiar with the ARL format, and in general preferred it over the IPEDS form. The Board again accepted the Committee's recommendation. We sincerely hope this change meets with your approval.

Two copies of each questionnaire are enclosed. One copy is intended to serve as a working copy. Please return one copy of the completed questionnaire to Academic Library Statistics, ACRL/ALA, 50 East Huron Street, Chicago, IL 60611 no later than **November 1, 1988**.

If you have any questions about how to fill out the questionnaire please contact Mary Ellen Davis, ACRL Program Officer, at (312) 944-6780, extension 287. Any comments or suggestions you have toward improving the questionnaire will be appreciated and should be directed to Kent Hendrickson, Dean of Libraries, University of Nebraska-Lincoln, Lincoln, NE 68588-0410.

Sincerely,

Kent Hendrickson

BUILDING ON THE FIRST CENTURY

MEMORANDUM

TO: Institutions Included in the ACRL University Library Statistics Survey Group

FROM: Mary Ellen K. Davis, Program Officer

DATE: September 23, 1988

RE: 1987-88 ACRL University Library Statistics Survey

Since ACRL initiated its University Library Statistics Survey in 1978 your institution has been a member of our survey group. We have appreciated your contribution to our survey and would welcome your continued participation. However, at this time we would like to give you the opportunity to decide whether or not to continue in this survey group.

As your probably know, ACRL's survey group has been comprised of those non-ARL (Association of Research Libraries) institutions categorized as either Research I or II or Doctorate Granting Colleges and Universities I or II by the Carnegie Foundation. We have revised our survey group to reflect the changes made in the Carnegie Foundation's A Classification of Institutions of Higher Education, 1987.

Although your institution no longer falls into one of those four categories we would welcome your continued participation in our statistics survey because of your past participation. This would add to the data series already existing for your library and this could be valuable from a historical perspective.

Please complete the form below and return it to the ACRL Office, 50 East Huron Street, Chicago, IL 60611 by October 15, 1988 if you no longer wish to participate in the ACRL survey. If you do want to participate in the survey please complete and return the enclosed survey by November 1, 1988.

Thank you for your consideration. Please do not hesitate to contact me if you have any questions (Toll free: 1-800-545-2433). I look forward to hearing from you.

____ Please remove our library from the ACRL statistics survey group.

BUILDING ON THE FIRST CENTURY

MEMORANDUM

TO: Canadian Institutions Included in the ACRL University Library Statistics Survey Group

FROM: Mary Ellen K. Davis, Program Officer

DATE: September 23, 1988

RE: 1987-88 ACRL University Library Statistics Survey

Since ACRL initiated its University Library Statistics Survey in 1978 your institution has been a member of our survey group. We have appreciated your contribution to our survey and would welcome your continued participation. However, at this time we would like to give you the opportunity to decide whether or not to continue your paticipation in this survey group.

As your probably know, ACRL's survey group has been comprised of those non-ARL (Association of Research Libraries) institutions categorized as either Research I or II or Doctorate Granting Colleges and Universities I or II by the Carnegie Foundation. We have revised our survey group to reflect the changes made in the Carnegie Foundation's A Classification of Institutions of Higher Education, 1987.

A telephone poll of 1985-86 survey respondents conducted by ACRL's Academic Library Statistics Committee brought to our attention the fact that many Canadian institutions are pleased with the statistical information they receive by completing the survey sent out by the Canadian Association of Research Libraries. Because your data needs may be met by the CARL survey, we wanted to offer your institution the opportunity to decide whether or not to continue participating in the ACRL survey group.

Please complete the form below and return it to the ACRL Office, 50 East Huron Street, Chicago, IL 60611 by October 15, 1988 if you no longer wish to participate in the ACRL survey. If you do want to participate in the survey please complete and return the enclosed survey by November 1, 1988.

Thank you for your consideration. Please do not hesitate to contact me if you have any questions (Toll free: 1-800-545-2455). I look forward to hearing from you.

____ Please remove our library from the ACRL statistics survey group.

FOOTNOTES TO THE ACRL STATISTICS, 1987-88

Institution	*Category from Main Tables*	*Notes*
Adelphi		Data are for the period September, 1987-August, 1988.
		Does not include data from the Huntington Center nor the Manhattan Center.
Akron		Does not include data from the Music and Slide Libraries, nor the Wayne General & Technical College.
	(1)	Does not include 412,796 paper government documents, maps, A-V materials, etc.
	(4)	Includes titles purchased.
Alaska		Includes data from the Bio-Medical Library located on the Fairbanks campus.
Andrews University	(4)	Estimated figures.
Arkansas	(5-7,16)	Include monographic series.
	(18)	Includes bibliographic utilities, literature searching, and memberships.
Atlanta University Center		Comprised of seven institutions: Atlanta University, Interdenominational Theological Center, Morehouse School of Medicine, Clark, Morehouse, Morris Brown, and Spelman Colleges.
	(13)	Does not include 61 work study students who worked 18,679.75 hours and who earned $66,974.39.
		Graduate student count does not include Atlanta University for which the enrollment is unavailable.
Auburn		Data are for the period October 1, 1987-September 30, 1988.
	(6)	Includes 1,634 government documents cataloged and housed in the main collection.

Institution	*Category from Main Tables*	*Notes*
Auburn (Continued)		
	(8)	Excludes government document microforms.
	(11)	Includes 1 FTE hired under ALA Newspaper Project.
	(13)	Includes 4.1 FTE for special barcoding project.
	(18)	Memberships: $1,675; literature searching and information retrieval: $25,619.
	(23)	Includes $42,992 in work study funds.
	(24)	Fringe benefits are not included in the expenditures for salaries and wages. The expenditures for fringe benefits were $145,118.
Ball State		Does not include Architecture nor Science-Health Science Libraries.
Baylor		Includes data from the Learning Resource Center at the School of Nursing, Dallas campus.
Boston College		Data are for the period June 1,1987-May 31, 1988.
	(2,3)	Includes 38,460 volumes added as a result of a recount.
	(17)	Figures are from Law Library only. These data are not disaggregated at other libraries.
	(18)	$45,180 for online legal research and $56,288 for miscellaneous materials expenditures.
Bowling Green State University		Includes Firelands Campus.
	(1)	Volume count is both physical and bibliographical.
	(21,22)	$2,454,985 expended on salaries for Professionals and Nonprofessionals.
Brandeis	(11)	Include 1 FTE funded from a grant.
California, Santa Cruz		Ph.D.'s awarded figure is from 1986-87.
Carnegie-Mellon	(5)	Figure does not include annuals (reports, yearbooks, etc.).

Institution	*Category from Main Tables*	*Notes*
Claremont		Comprised of data from all the libraries of the Claremont Colleges. These include the central Honnold/Mudd complex, the Denison Library on the Scripps College campus, the Sprague Library on the Harvey Mudd College campus, and the Pomona Science Library on the Pomona College campus.
Clark		Includes data from Map and Science libraries.
Clarkson	(1-3)	Includes government documents, all cataloged. Some are classed in Dewey and others in the Superintendent of Documents Classification. Of the volumes held, 37,858 are documents. Of the volumes added, 113 are documents. Two of the volumes withdrawn were documents.
	(6)	Includes 334 depository serials.
	(8)	Includes many government document microforms.
	(15)	Includes many series cataloged with Dewey classified books.
	(21-26)	Fringe benefits excluded.
		Figures for students are head counts.
Clemson	(1)	Figures reflect a correction made to accommodate an error in prior year's figures.
Cleveland State	(15)	Includes expenditures for microforms and audio-visual materials.
Denver		Includes data from the Music Library.
	(18)	Includes expenditures of $55,000 for OCLC; Online catalog (CARL), $83,177; Computer equipment, $9,604.
		Figures for full-time students include graduates and undergraduates.
Drake		Data are for the period June 1, 1987-May 1, 1988.
		Number of serials received but not purchased was "negligible."

Institution	*Category from Main Tables*	*Notes*
Drexel	(4)	Titles purchased.
	(8)	Includes government documents microforms.
	(14)	Includes 3 positions in service to business and industry.
	(25)	$15,070 expended for database searching.
East Texas State		Data are for the period September 1, 1987-August 31, 1988.
		Includes data from the Metroplex Commuter Facility in Garland, Texas.
Florida Institute of Technology		On June 30, 1980, "total goverment microfiche" held, 58,276; "total U.S. Government documents," 135,211, "total documents not counted as periodicals or cataloged," 97,018.
Florida Atlantic		Includes data from Ft. Lauderdale and Palm Beach.
Fordham		All statistics include Lowenstein Library at Lincoln Center and the School of Law Library at Lincoln Center.
George Washington University		Collection figures exclude government documents. These were included in previous years.
	(5-7)	Gelman, and Burns Law Library exclude government document serials in the countof serials. Himmelfarb (Medical) Library includes them.
	(9)	Includes data from the Media Resources Unit and INQUIRE (a cost recoveryresearch and document delivery service).
	(10)	Includes data from Media Resource Unit at Gelman.
	(11)	Includes 1 FTE funded by grant at Gelman Library.
	(12)	Includes 5 FTE Cost Recovery Program at Gelman Library.
	(13)	Includes 6 FTE Cost Recovery Program at Gelman Library.
	(17)	Represents expenditures for backfile and replacement materials only. Expenses for other types of materials are included in (15) and (16).
	(21)	Includes $10,000 in grant funding.
	(22)	Includes $70,674 on Cost Recovery Program for Gelman. Burns Law Library includes figures in (21).
	(23)	Includes $56,657 on Cost Recovery Program for Gelman.

Institution	*Category from Main Tables*	*Notes*
Georgia State	(4)	Includes 16,347 volumes for the Main Library and 2,826 titles (monographs and serials) for the Law Library.
	(5-7)	Count of current serials includes government documents at the Law Library but not the Main Library.
	(17)	Law Library only.
	(21,22)	$2,704,147 for professionals and nonprofessionals combined.
Hahnemann University		This is a health sciences library serving a medical school, allied health and nursing schools, and mental health sciences and biomedical sciences graduate school.
Hofstra		*Most* Law library figures are included. Exceptions are noted below.
		Volumes withdrawn does not include Law Library.
	(4,5,7,21-23)	Exclude Law.
	(21-24)	(21-24) do not include $413,936 in fringe benefits.
	(23)	Does not include work study students.
	(24)	Includes Law.
Idaho State	(20)	No binding done last year owing to a rebid of the contract. Normal expenditure is approximately $10,000.
Illinois, Chicago	(17)	Estimated figure.
Kansas State	(15)	Includes expenditures for backfiles, replacement issues, and new serials.
	(17)	Included in (15) and (16).
Loma Linda		Does not include La Sierra Campus.
	(16)	Includes expenditures for backfiles of up to five years of new subscriptionsstarted during the fiscal year.
	(17)	$1,333 for serials in microform; balance for audiovisual materials.
	(18)	$4,373 for security devices for serials.

Institution	*Category from Main Tables*	*Notes*
Loma Linda (Continued)		Figures for the number of graduate students are approximate.
		Figures for faculty include 535 on the faculty of the School of Medicine.
Loyola, Chicago		Includes Lewis Towers and Rome Center Libraries (which have about 50,000 volumes).
Maine, Orono		Includes data from the Bangor Campus and the Darling Center, Walpole, Maine.
	(16)	Includes monographic serials.
	(17)	Audiovisual and electronic media costs are included in (15) and (16).
	(18)	These are NELINET costs.
	(23,26)	Include $57,308 for work study students.
Marquette		Does not include data from the Law library.
	(17,18)	Included in (15) and (16).
Maryland, Baltimore County		Contains a U.S. and Maryland documents depository holding 175,289 items and asubstantial audio-visual collection including more than 350,000 photographicprints and negatives.
	(4)	Volumes purchased and cataloged.
	(5-8)	Includes government documents serials that are shelved as a part of the generalcollection.
	(23)	Includes salaries of temporary professional and nonprofessional staff.
Miami, Ohio		Figures do not include data from the Gardner/Harvey Library, Middletown, Ohio, nor Rentschler Library, Hamilton, Ohio.
	(18)	Includes $150,000 for OCLC; $12,000 for literature searching.
Mississippi	(18)	Figures are from Law library only.

Institution	*Category from Main Tables*	*Notes*
Mississippi State College		Does not include data from the Meridian Branch Campus, Meridian Mississippi.
	(2,3)	Do not include unprocessed volumes purchased during this year.
	(19)	Reflects the receipt and expenditure of a non-recurring Special Library Appropriation.
Missouri, Kansas City		Count of total full-time graduate students does not include 1,223 full-time"First Professional Students."
		Count of total graduate students does not include 8 part-time "FirstProfessional Students."
Missouri, Rolla	(15-26)	Figures do not include funds from revolving accounts.
Missouri, St. Louis		Includes data from the Education and Health Sciences Libraries.
Montana	(2)	Includes 295 theses. Does not include 45 music scores.
	(20)	Some binding is done in-house.
